Protest against Hewlett Packard (HP) at Berlin-Alexanderplatz

On 29 November 2016, International Day of Solidarity with the Palestinian People, around 30 people from various solidarity groups protested against Hewlett Packard (HP) in front of SATURN, well-known *German* chain of electronics stores, Berlin-Alexanderplatz. The International Boycott HP Network and the Palestinian BDS National Committee was calling for an [international week of action](#) against HP (Nov 25 - Dec 3). The US company plays a key role in Israel's oppression of Palestinians.

Many passers-by were amazed to hear that HP not only offers computers, printers and related accessories on reasonable prices but also is one of the most important providers of information technology and services for the Israeli military and security sector and in that complicit in the oppression of Palestinians.
